

Hasan A. Azim

Merchandiser — Sourcing & Supply Chain · ERP Automation & Industrial Engineering

Dhinia, Savar, Dhaka, Bangladesh | 01794823274 | siddik.azim20@gmail.com | [linkedin.com/in/hasan-a-azim](https://www.linkedin.com/in/hasan-a-azim) | hasan-azim-portfolio.pages.dev

PROFESSIONAL SUMMARY

Merchandiser in **Sourcing & Supply Chain** at **Jinnat Fashion Ltd., DBL Group**, handling accessories and trims on **Oracle EBS R12** — Master BOM booking, purchase requisitions, price and budget control, and supplier follow-up. Industrial Engineer by training with **2.8+ years in the RMG sector**, previously **IE Executive in Snowtex Group's central Project Opex & CI team** across both factories, and MTO Leader for the six-month trainee programme. Builds the tools he uses: designed and shipped an **Oracle requisition automation system now running on 40+ colleagues' machines**, and a capacity sticker generator **adopted factory-wide by every IE**, alongside operator-level IoT production devices, QR material traceability and live KPI dashboards — all in live production. Experienced in direct buyer handling with **Decathlon**, leading weekly SUM meetings on OWE & QCO with root-cause analysis and agreed action plans. BSc in Textile Engineering (NITER, First Division).

EXPERIENCE

Merchandiser — Sourcing & Supply Chain

Aug 2026 – Present

Jinnat Fashion Ltd., DBL Group | Dhaka

- Accessories and trims sourcing on **Oracle EBS R12**: Master BOM booking, purchase requisitions, price per unit, wastage and booking percentage, and supplier assignment.
- Budget ownership per tracking number — checking remaining budget before commitment and escalating revisions to marketing with the exact figures rather than after a failure.
- Supplier follow-up and coordination with the Store Department so production is never held on a trim.

Flagship: Oracle PR Booking Bot — designed, built and maintained in-house

Identified that purchase requisitions consumed close to **30% of a merchandiser's day**, repeated 30–50 times daily through an identical click-path. Built an automation system that performs the entire path unattended and proves each step before committing — replacing two dedicated PCs, a full-time operator role and four hand-offs per error. Includes automatic duplicate handling, budget checks before any change, Excel and PDF reporting, a machine-bound licence system and self-updating deployment.

1,000+
tracking numbers processed

40+
colleagues using it daily

94%

IE Executive — Project Opex & CI (Central IE) & MTO Leader

to Jul 2026

Snowtex Group | Dhamrai, Dhaka

- Central IE across both factories (Snowtex Outerwear and Snowtex Sportswear) — monitoring, supporting and training the IE teams of each.
- **MTO Leader:** guided each Management Trainee Officer batch through the full six-month programme — classes, problem know-how and how the group operates.
- Core member of the **factory automation & Industry 4.0** initiative: operator-level IoT devices showing live production count, daily target and previous-day PIB, with capacity auto-generated from the data, plus an individual operator KPI system with an audit panel.
- **QR-code traceability** implemented from Cutting to Store — fabric location, consumption and a full automated material track record.
- **Decathlon buyer handling:** followed the INDUS line, owned OWE and QCO, and led the weekly Monday SUM meeting presenting root-cause analysis and agreeing action plans with follow-up.
- **Capacity sticker generator — adopted factory-wide.** Built a tool that turns the OP Process Skill Tag Report into printed capacity stickers (capacity + PIB) for every workstation in seconds. **Every IE in the factory now uses it**, replacing hand-written cards on every line at every style change.
- Other tools built (AI-assisted): Android DPR app used across departments for Decathlon compliance checks; Python automation for daily data download-and-paste into Excel; HTML web apps for sewing-line efficiency, line cost and variance; CPM and OWE/OEE dashboards in Looker Studio.

IE Executive

Feb 2025 – 2026

Snowtex Outerwear Ltd. (SOL) | Dhamrai, Dhaka

- CPM and factory costing; OWE monitoring for Decathlon lines; IE control for CC styles.
- DPR compliance and QCO improvement, while retaining line layout and floor performance ownership.

Management Trainee → Junior IE Executive (Line IE, then Floor IE)

Jan 2024 – Feb 2025

Snowtex Sportswear Ltd. (SSL) | Dhamrai, Dhaka

- Started hands-on as **Line IE** — sewing line layouts, running the lines and managing large operator teams — then took **Floor IE** responsibility for the whole floor.
- SMV studies, time & motion analysis and standard data validation across multiple product lines.
- Line layout design to improve workflow and reduce WIP; production targets set from SMV and capacity.
- Manpower planning, shift balancing and absentee management; operator recruitment, selection, training and skill-enhancement programmes.
- Style changeover planning and pilot runs to minimise downtime and ramp-up loss; Kaizen and 5S applied to remove bottlenecks.

Intern — All Departments

Nov – Dec 2023

GMS Composite Knitting Ind. Ltd. | Kashimpur, Gazipur

- Rotated through knitting, dyeing/wet processing and finishing — the end-to-end textile flow from development to shipment.

CORE COMPETENCIES

▪ Oracle EBS R12 (PR / BOM)	▪ Accessories & Trims Sourcing	▪ Budget & Cost Control
▪ Supplier Follow-up	▪ SMV Study & Validation	▪ Line Balancing & Layout
▪ OWE / OEE Monitoring	▪ QCO / Changeover	▪ Manpower & Capacity Planning
▪ Root Cause & Action Plans	▪ Buyer Handling (Decathlon)	▪ Process Automation & RPA
▪ Kaizen & 5S	▪ Team Training & Mentoring	▪ Data Dashboards & Reporting

TECHNICAL SKILLS

Automation	Process automation and RPA, browser-driven ERP automation, IoT production devices, QR traceability, self-updating software deployment
Software	Python, Android Studio (Java), HTML web applications, Google Apps Script, AI-assisted development

Data	Advanced Excel (pivot, VLOOKUP, dashboards), Google Sheets, Looker Studio, CPM & OWE/OEE reporting
Industry tools	Lectra Modaris V6R1, Araweave, Oracle EBS R12
Design	Photoshop, Illustrator, InDesign, Canva, Figma
Industry knowledge	Apparel manufacturing, supply chain and sourcing, wet processing (reactive dyeing), garment tech pack, apparel merchandising
Languages	Bangla (native), English (fluent)

EDUCATION

BSc in Textile Engineering	2019 – 2023
NITER — National Institute of Textile Engineering & Research · First Division	
HSC (Science)	2018
Rangpur Govt. City College · GPA 4.00 / 5.00	
SSC (Science)	2016
Jnankur Pilot High School · GPA 4.89 / 5.00	

CERTIFICATIONS & AWARDS

- **Apparel Merchandising (SEIP)** — product development to shipment · NITER, 2023
- **Reactive Dye Colour Matching Expert** · NITER, 2023
- **Outstanding Research Award** · NITER Science Society, 2023
- **Garments Tech Pack Expert** · NITER, 2023
- **Graphic Design & MS Excel Expert** · e-learn bd
- **Outstanding Leadership Award** · NITER Science Society, 2023

BEYOND WORK

- Runs "**Study Material BD**", an educational YouTube channel with four published courses (Excel, ICT, Photoshop).
- Self-published children's author on **Amazon KDP**.
- Independently built Android applications, including a Bangla text-to-voice creator with MP3 export.

PERSONAL INFORMATION

Date of birth	20 October 2000
Nationality	Bangladeshi
Marital status	Single
Permanent address	Dhinia, Parbatipur, Dinajpur, Bangladesh
