```

Professional Summary</h2>

```

<p class="summary">Industrial Engineer with <b>2.8+ years of
hands-on IE experience</b> in the RMG sector at Snowtex Group,
currently serving as <b>IE Executive in the central Project Opex
& CI (Continuous Improvement) team</b> operating across the
full group (SOL & SSL factories). Driving factory
<b>automation and Industry 4.0 implementation</b>: operator-level
IoT production devices, QR-code material tracking from cutting to
store, and individual operator KPI systems with audit panels.
Builder of practical digital tools all used in live production.
Experienced in direct buyer handling with <b>Decathlon</b>,
leading weekly SUM meetings on OWE & QCO with root-cause
analysis and action plans. As Central IE, monitors, follows up,
and trains the IE teams of both factories. BSc in Textile
Engineering (NITER, First Division), with a data-driven,
continuous-improvement mindset.</p>

```

Core IE Competencies</h2>

```

<table class="comp">
|  |  | | | | | |
|---|---|---|---|---|---|---|
| <td> SMV Study & Validation</td> <td> OWE / OEE Monitoring</td> <td> QCO / Changeover Optimization</td> </tr> |  | | --- | | <td> Manpower & Capacity Planning</td> <td> Root Cause Analysis & Action Plans</td> <td> Buyer Handling (Decathlon INDUS)</td> </tr> | |

```

Excel / Python / Looker Studio	Project Opex & CI Team (Central IE)
Current Role	

Snowtex Group | Dhamrai, Dhaka

Central team operating across the full Snowtex Group each operator counts production in real time, sees today's target and the previous day's achievement (PIB); line/operator capacity is auto-generated from IoT data.

- QR-code tracking:** implemented QR-based tracking from Cutting to Store review OWE & OCO, present line-level root-cause analysis, and agree improvement action plans with follow-up.
- Decathlon INDUS line:** follow the INDUS buyer line with hands-on OCO and OWE management experience.
- Tools built (AI-assisted):** Android DPR app used by every department to check Decathlon Production Requirement compliance; Python automation for daily data download-and-paste into Excel (saving manpower and time); HTML web app analyzing sewing line efficiency, line cost, and variance.

IE Executive	Feb 2025 Feb 2025
--------------	-------------------

Snowtex Sportswear Ltd. (SSL) | Dhamrai, Dhaka

- Conducted SMV studies, time & motion analysis, and validated standard data across multiple product lines.
- Designed and implemented line layouts to improve workflow efficiency and reduce WIP.
- Set production targets based on SMV and capacity; monitored KPIs for continuous performance tracking.
- Managed manpower planning, shift balancing, and absentee management to maintain line stability.
- Recruited, selected, and trained operators; developed skill enhancement programs.
- Led style changeover planning and pilot runs, minimizing downtime and ramp-up losses.
- Applied Kaizen and 5S to identify and eliminate bottlenecks, improving line efficiency.
- Coordinated with Production, QA, and Planning teams to ensure seamless operations.
